

Authorship and Co-Authorship Policy

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported research. All those who have made significant contributions should be listed as co-authors. The corresponding author ensures that all contributing co-authors persons are included in the author list. The corresponding author will also verify that all co-authors have approved the final version of the paper and have agreed to its submission for publication. There is no limit for number of authors for the same paper.
